

SUSTAINABLE LAFAYETTE

MISSION:

Our mission is to provide the community of Lafayette with the information, inspiration, tools, and assistance that facilitate the adoption of sustainable practices. Furthermore, we seek to act as a model, mentor, and partner for other interested communities.

APPROACH:

Sustainable Lafayette works in a collaborative, practical, and constructive manner. We build on success already underway, and we localize information and tools to be the most relevant and useful for the community. We try to partner with organizations inside and outside of Lafayette that can help us achieve our mission.

THOSE SERVED:

We serve the people and organizations within Lafayette that play a role in the community's sustainability (residents, local businesses, schools, property owners, city government, and community organizations) in order to benefit the environment and future generations.
